

I am strongly opposed to the deregulation proposals of the broadcast industry that will be up for a vote on June 2. I believe that we must limit media consolidation because our democracy depends upon a citizenry educated by many different sources. Also, local news will suffer. This week I was not able to get any local news on 85 mile an hour winds that were ripping through my community during a severe electrical storm. The weather channel was running a show on weather (no reports) and the radio was all music. I did not even hear a severe weather alert. Vote no on the changes. Say no to big money. We citizens are counting on you. And we ARE watching.
